### **ISIS Genesis Salt Water System -Benefits**

#### **It's GREEN!**

Less water used. Fewer Chemicals. Of Course!

#### **Softer Water & Softer Skin**

Though the concentration is low, much lower than say sea water, adding Tru Blu! sodium bromide salt to your spa water gives it a softer feel. You will also find that your skin feels softer after you've used your spa.

#### **Less Maintenance**

Spas generally require a water change every 3 - 4 months. This is because of the build-up of chemicals that you have introduced. Since you are introducing no chemicals to your spa with a Genesis Salt System, you will change your water once a year!

You will put the sodium bromide salt (also called Tru Blu!) in your spa once for the year.

It is continuously recycled to produce bromine. Eliminate regular shocking

Reduced foaming and scum lines
